

# We Are Dedicated to Improving Perinatal Health.

The National Perinatal Information Center is dedicated to enhancing maternal and newborn care, improving patient outcomes and recognizing opportunities to elevate health equity.

## Now Offering:

## Data-Driven Training & Support Materials for Clinical Teams

Standardization of care using best practice is key to reducing morbidity and mortality.

In partnership with Elemeno Health, NPIC is offering data-driven training and support materials for clinical teams, available in a current, concise format at the point of care.

### This includes:

- 24/7 On-demand access to a microlearning solution built to keep clinical staff up to date on current, data-based and hospital-specific best practices to reduce variation in care.
- Ability to fully customize materials and resources to suit each hospital department's specific needs and context.
- Materials including tip sheets, curated resources, and guidelines, easily searchable by staff at the moment they need it.

## Let's Drive Value, Quality, Safety, and Best Practice Together.

NPIC and Elemeno are working together to empower medical staff, decrease errors, and improve patient outcomes. NPIC shared member resources are being transformed into microlearning selections that will be delivered through the Elemeno platform.
